What is Stone Veneer?

Manufactured Stone veneer is often as striking and beautiful as natural stone it emulates.

Also known as cultured stone. Manufactured stone veneer is a man-made material designed to replicate the look of natural stone in a variety of architectural applications ranging from exterior facades to unique statement walls.

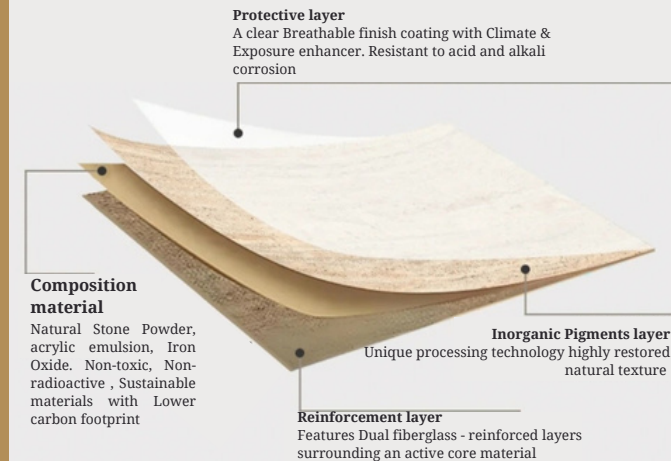

Product Features

- 1** Light weighted and Install Efficiency
Size: 47"W x 94"L
Thickness: 1/8 inch
Weight : 26lb
- 2** Moisture and Water Resistance
Interior/Exterior Wall Panels
- 3** Class A Fire Retardant
- 4** Aesthetic Appeal and Versatility
- 5** Cost -Effective and Low Maintenance
- 6** 100% Natural Components
Natural Stone powder
Acrylic Emulsion
Iron Oxide for pigmentation
- 7** Durability & Longevity
Durable and Resistant to weathering, Cracking, Stains and Fading.
- 8** Easy Installation – Just Like Cultured Stone or Final Stucco Coat
Installation follows the same straightforward steps as applying cultured stone or the final 1/8-inch coat of stucco. No special tools or training required—if you're familiar with these common processes, you're ready to install!
