Product Features

Delivers the look and feel of natural travertine at a fraction of the weight and cost

Water & Moisture-Resistant
Freeze & Crack Resistance
Class A Fire Rating

Constituent Materials: Made with natural Stone Powder and Iron Oxide

Retains the authentic texture and robustness of Natural Stone surface. UV protection and minimal maintenance required.

Versatility - From Modern to Classic Designs

Durability & Longevity - Resistant to harsh weather conditions, stains, cracks and fading.

Easy Installation – Just Like Cultured Stone or Final Stucco Coat

Combines affordability with quick, hassle-free installation for time-sensitive projects

Sustainability: Low carbon footprint and Low to no VOC 's emissions

25- Year Limited Warranty

What is Travertine Stone Veneer?

Travertine Stone veneer is a decorative facing material made to look like natural stone, but it's typically much lighter and more affordable. It's used to give the appearance of a natural stone wall or surface without the cost and weight of real, full-thickness stone.

How is Manufactured Stone Veneer made?

Man-made manufactured thin Stone Veneer

- Made from Natural Stone Powder , Acrylic Emulsion and Iron Oxides for coloring pigmentation.
- Molded to look like real stone.
- Even lighter and more affordable than natural stone

What are the common uses?

- Exterior facades or accents on buildings
- Fireplace surrounds
- Interior feature walls
- Outdoor kitchens or retaining walls
- Hotel outdoor lounges

What are the dimensions of each panel?

Each Panel is **47"W x 94"L** , Thickness $\frac{3}{8}$, and weights **26lb**

Will each panel have the same pattern?

Yes, when ordering multiple panels the pattern will slightly look alike.

Is the color intend to fade over time?

Each piece is coated with natural mineral inorganic ink (iron oxide) that helps the stone veneer maintain the colors and nuance of natural stone for decades to come.

Will Stone Veneer require periodic maintenance?

Like natural stone, stone veneer is virtually maintenance-free. Building owners merely need to wash the surfaces occasionally to remove dust or dirt. A protective layer is recommended every 15 years, depends on the geographical climate area.

Specifications
