PINNACLE OF MODERN
ARCHITECTURE

Product Features

Delivers the look and feel of natural travertine at a fraction of the weight and cost

Water & Moisture-Resistant
Freeze & Crack Resistance
Class A Fire Rating

Constituent Materials: Made with natural Stone Powder and Acrylic Emulsion

Retains the authentic texture and robustness of Natural Stone surface. UV protection and minimal maintenance required.

Versatility & Customized Designs - From Modern to Classic Designs

Durability & Longevity - Resistant to harsh weather conditions, stains, cracks and fading.

Easy Installation – Just Like Exterior Cultured Stone or Wall Tiles

Combines affordability with quick, hassle-free installation for time-sensitive projects

Sustainability: Low carbon footprint and Low to no VOC 's emissions

25- Year Limited Warranty

What is Travertine Stone Veneer?

Travertine Stone veneer is a decorative facing material made to look like natural stone, but it's typically much lighter and more affordable. It's used to give the appearance of a natural stone wall or surface without the cost and weight of real, full-thickness stone.

How is Manufactured Stone Veneer made?

Man-made manufactured thin Stone Veneer

- Made from Natural Stone Powder , Acrylic Emulsion and Inorganic Ink for coloring pigmentation.
- Molded to look like real stone.
- Even lighter and more affordable than natural stone

What are the common uses?

- Exterior facades or accents on buildings
- Fireplace surrounds
- Interior feature walls
- Outdoor kitchens or retaining walls
- Hotel outdoor lounges

What are the dimensions of each panel?

Panel is **47"W x 94"L (30 sq ft)**, Thickness $\frac{3}{8}$, and weights **26lb**

Will each panel have the same pattern?

Yes, when ordering multiple panels the pattern will slightly look alike.

Is the color intend to fade over time?

Each piece is coated with natural mineral inorganic ink (iron oxide) that helps the stone veneer maintain the colors and nuance of natural stone for decades to come.

Will Stone Veneer require periodic maintenance?

Like natural stone, stone veneer is virtually maintenance-free. Building owners merely need to wash the surfaces occasionally to remove dust or dirt. A protective layer is recommended every 15 years, depends on the geographical climate area.

PRODUCT SPECS

- **Panel Dimensions:** 47" W x 94"L
- **Thickness:** 1/8"
- **Weight:** 26 lb per panel
- **Joint Size:** 1/8" architectural joint recommended
- **Installation Orientation:** Vertical or horizontal
- **Installation Method:** Adhesive or thin-set mortar
- **Fire Rating:** ASTM Class A Fire Rated

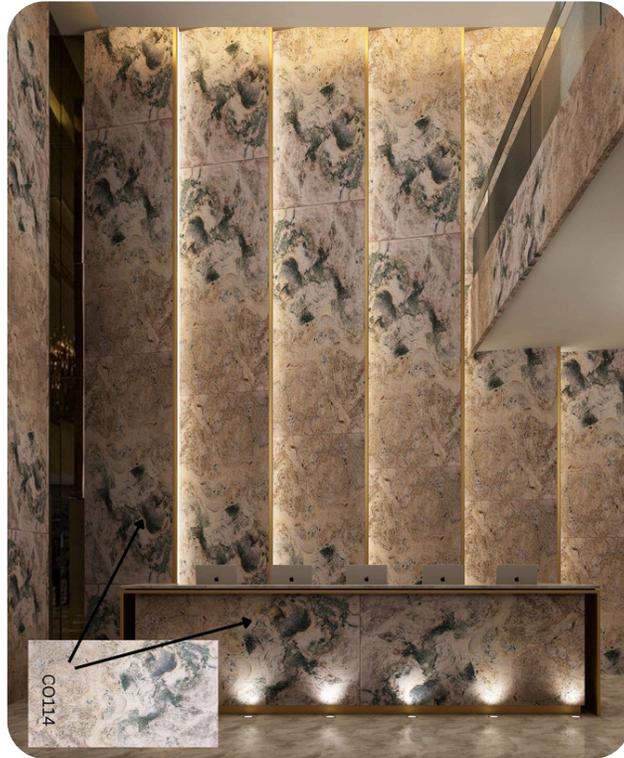

System Classification: **Non-structural** decorative veneer panel system

The panels are installed over **code-approved** wall assemblies using polymer-modified thinset mortar

INSTALL INFO:

- **Application Substrate:**
 - Plywood
 - Drywall (interior applications only)
 - Cement board
 - Concrete
 - Metal substrates
 - Exterior sheathing systems
- **Adhered Installation:** Exterior-grade polymer-modified thin-set mortar.
Construction adhesive for interior drywall.
- **Cut Tools:** Long Cut Snip, Circular Saw, Track Saw, Laser Cut
- **Seam Options:** Grouting joints
- **Corner Joint Options:** Lap Joint, Grouted corner joint .

About Us

A COMMITMENT TO INNOVATION AND SUSTAINABILITY

EliteAzure Travertine Thin Stone Veneer Panels are manufactured architectural panels designed to replicate refined, monolithic travertine wall systems in modern residential, commercial, and hospitality environments. The large-format 47" × 94" panels create clean, monolithic surfaces with minimal joints, delivering a seamless and contemporary aesthetic. These panels are engineered for efficient installation while maintaining the authentic look and texture of natural travertine.
