Large Format Architectural Veneer Panels

47" x 94" Monolithic Panels

1/8" Thickness

26 lb per Panel

PRODUCT OVERVIEW

Elite Azure Travertine Thin Stone Veneer Panels are manufactured architectural panels designed to replicate refined, monolithic travertine wall systems in modern residential, commercial, and hospitality environments.

Large-Format Travertine Thin Stone Veneer Panels engineered for architects and designers who demand premium aesthetics with greater installation efficiency. Our 47" x 94" panels create seamless, monolithic wall surfaces with **minimal joints**, delivering the **timeless beauty** of natural travertine while **reducing installation time, labor, and structural load**.

Panels are installed over **code-approved wall assemblies** using polymer-modified thin-set mortar or Construction adhesive for interior surfaces

PRODUCT SPECIFICATIONS

Manufactured Travertine Stone Veneer Panels

Panel Dimensions: 47" Width / 94" Length
Thickness: 1/8" inch

Weight: 26 lb per panel

Joint Size: 1/8" architectural joint recommended

Installation Orientation: Vertical or Horizontal

Installation Method: Polymer modified mortar or adhesive

System Classification: **Non-structural**, decorative veneer panel system

ARCHITECTURAL BENEFITS

Monolithic Architectural Surfaces
Large-format panels reduce joints and create seamless, continuous surfaces with a refined appearance.

Lightweight Veneer System
At only 26 lb per panel, significantly lighter than traditional stone systems.

Premium Travertine Texture
Manufactured to replicate the natural beauty and veining of authentic travertine.

Durable Architectural Material
Engineered for long-term performance in demanding architectural applications.

DESIGN APPLICATIONS

Elite Azure Travertine Veneer Panels are ideal for:

- Luxury hospitality projects
- Interior feature walls
- Exterior architectural facades
- Veneer accent elements
- Retail and commercial spaces
- Lobby and amenity areas
